

TESTIMONIAL - JCU Career Services Center, Summer 2015

My name is Wasim Khizaran and I graduated in **Communications** from *John Cabot University* in Spring 2015. Obtaining a Bachelor's Degree in Communications provides students with the knowledge and the skills to process any work they might face in the second step after university.

Furthermore, JCU did not only provide me with knowledge, but it also helped me to overcome the most difficult step after university, which is a step that every person takes in order to find a job. In fact, with the help of **JCU Career Service Center**, I am currently working as *submission officer* at VFS Tasheel.

VFS Tasheel is a global company which offers its services especially for governments and diplomatic missions worldwide. It facilitates **visa services** in behalf of different governmental authorities, as embassies or consulates, including tourism and pilgrim visas to Saudi Arabia.

Working with VFS Tasheel is such a great opportunity to build my experience in terms of **communications skills**. First, taking responsibility of providing applicants with the right information in order to apply for a visa. Second, taking responsibility of passports from the moment we receive them until the moment we hand them in. Finally, making sure that all applicants are comfortable and provide them with the best service.

In addition, it is my pleasure to work at VFS Tasheel after experiencing their **great team work**, with different backgrounds and languages, and how enthusiastic, positive, bilingual and supportive they are. Every member in VFS Tasheel team helped me to learn and understand the procedure of every step I have to take based on this experience.

Finally, I really recommend VFS Tasheel to JCU graduates and students because they will have **great mentors**, who will help them build their experience, in terms of language and **business communication skills** in order to communicate with different nationalities.
