

The JCU Institute for Entrepreneurship presents:

Marco Sgroi

Partner and R&D Director at So. Tel. s.r.l.

The lecture will present the complete process of the design of an Internet of Things product. It will cover aspects such as planning, implementation cycles, design choices, integration issues, and testing of a family of products with HW and SW components.

Marco Sgroi is the Head of R&D of So.Tel, provider of solutions for telecommunication systems. He has worked for twenty years on research and development of technologies and applications in the Internet of Things domain. He has received a Ph.D. in Electrical Engineering and Computer Sciences from the University of California at Berkeley. He has worked as a Researcher at DoCoMo Communications Laboratories Europe and has been Director of the WSN Lab of Pirelli and Telecom Italia in Berkeley.
