# COMPANY TESTIMONIAL

Pietro Paganini

*Co-founder and Curiosity Officer at Competere*

"Thanks to our work with JCU Career Services, we have been given a chance to expand on our organization ideas, solutions, and reach. We work with students sharing with them the basis of company operations, research and advocacy techniques, and how to analyze data properly. The students provided to us by JCU bring in fresh ideas and diverse points of view. We pride ourselves in learning from them while they also learn from us. We have found the Career Services department to be an extremely beneficial resource of knowledge and new blood for the company, with the students always ready to learn and grow. The students we have chosen to hire have taken pride in their work and excelled within the company. We thoroughly enjoy working with JCU students and the environment that they provide, watching them either grow within the company or take their knowledge elsewhere after their time with us. The Career Services staff constantly follows our work and promptly provides the right profiles for our needs, while also meeting the needs of their students to experience and grow."
