

COMPANY TESTIMONIAL

Walter Garcia

Chief Operations Officer at IPS Inter Press Service

"We have been working with interns provided through John Cabot University's Center for Career Services for a few years and they have always shown great interest in our work, they have been extremely enthusiastic about sustainable development issues and never discouraged by the challenges. All of them have shown initiative and resourcefulness while solving problems and achieving the goals sometimes difficult, that we have established for them during their internship with us. It is really encouraging to see these young students quickly learn and adapt to the different challenges they have to face while working with us. I am grateful to Antonella and her team, they have always made the whole process extremely simple and the selection seamless."
