

**TESTIMONIAL** – *JCU Career Services Center, Spring 2015*

My name is Carolina Ferrarello and I graduated in **Marketing** and **Psychology** in March 2014. I chose *John Cabot University* for its knowledgeable professors and skills building activities. This University offers all the tools a graduate needs to be prepared for the **international job market**.

Since I entered *John Cabot University*, I wanted to move in **Australia** and find a marketing job after graduation. I made it happen thanks to the skills I acquired during the years at JCU. The University environment helped me to build an international mindset to fit myself in a foreign society. As a matter of fact, I have not experienced any cultural shock here in Australia.

The people in the **JCU Career Services Center** and the JCU professors make an extra-mile to help the students succeed professionally. Career Services Center offers all the activities to prepare a student to enter the international job market. As a matter of fact, the JCU Career Services Center hosts different resume, skills building, and etiquette **seminars** to help the students build an impeccable resume and pass job interviews in order to enter the job market hitting the ground running. The seminars are hosted by approachable and knowledgeable professors that put an amazing amount of effort in what they do for the joy of seeing students learn and succeed. And that is what makes the difference.

Professors' approachability is something that one cannot find easily everywhere. At *John Cabot University*, professors answer promptly to students enquiries. For example, if a student is preparing his resume for an internship and needs advice, the student can write an email to the Career Services Center and ask for an appointment.

**DO NOT MISS YOUR CHANCE AND APPLY FOR AN INTERNSHIP WHILE STUDYING AT JOHN CABOT!**
