

TESTIMONIAL

Spring 2021

JCU Center for Career Services

I will be graduating from John Cabot University in Spring 2022, with a degree in **Communications** and a double minor in **Philosophy** and **Art and Design**. I am currently doing an internship at **OK Productions LLC**, a **New-York** based company operating in the TV industry.

I produce and edit videos, create poster boards and advertising segments for other networks. This internship requires not only specific technical skills, such as knowledge of video editing software programs, but also a lot of hard work, team effort and dedication. The key is to manage time wisely and accomplish the assigned tasks within deadlines. **I feel this challenging and stimulating experience will help me with my career, because I am more aware of my skills and of the results I can achieve.**

I would recommend this internship to students interested in the TV/media industry. It is eye-opening to work with people in this field and understand how the media environment works. I am truly enjoying this experience and will always remember the people that have pushed me during this time. I would advise students to do internships while at JCU, because they help you prepare for your future and shape you as a young professional.
